THE STORY

If you're Pinoy, you know the sound. Tiles clacking on a folding table. Tito laughing too loud. Tita asking who shuffled wrong. Someone yelling **"Bisaklat!"** and the whole room losing it.

That's the mahjong I grew up watching. Jokers. Sagása. Sietepares. Tódas. The 17-tile version we actually play. Every other mahjong app played it the international way — beautiful games, but not ours. So I built one that does it right.

Filipino Mahjong: Joker Rules is the version Lola taught Tita who taught me — the first authentic Filipino mahjong app on the Google Play Store. Sit down with **Lola Winnie, Tita Nene, and Kuya Edgar** and climb a 7-tier Filipino rank ladder from Baguhan to Hari ng Mahjong. Free, no sign-up, no paywall. Built by one Fil-Am developer because the game my pamilya plays deserved a proper app.

WHAT MAKES IT FILIPINO

JOKER TILES

Wildcards that substitute for any suit — the signature mechanic missing from international mahjong apps.

BISAKLAT

Winning on the very first draw before any discard. The rarest, highest-paid hand in Filipino mahjong.

SAGÁSA

Completing your pung off another player's discard for an instant payout.

SIETEPARES

Seven pairs win — the high-risk, high-reward path for ambitious players.

TÓDAS

The full clean win. Both elegant and lucrative — a signature Filipino mahjong climax.

17-TILE HAND

The authentic Filipino variant — four more tiles than the 13-tile international version, changing the entire game flow.

IN GAME

"I named the bots after the people I learned from — Lola Winnie, Tita Nene, Kuya Edgar. The first time you face Lola Winnie at the table, something clicks. This isn't just a mahjong app. It's the version we play."
