

THE STORY

If you're Pinoy, you know the sound. Tiles clacking on a folding table. Tito laughing too loud. Tita asking who shuffled wrong. Someone yelling "**Bisaklat!**" and the whole room losing it.

That's the mahjong I grew up watching. Jokers. Sagása. Sietepares. Tódas. The 17-tile version we actually play. Every other mahjong app played it the international way — beautiful games, but not ours. So I built one that does it right.

Filipino Mahjong: Joker Rules is the version Lola taught Tita who taught me — the first authentic Filipino mahjong app on the Google Play Store. Sit down with **Lola Winnie, Tita Nene, and Kuya Edgar**, earn Mahjong Points with every win, and climb seven Filipino tiers from Baguhan to Hari ng Mahjong — unlocking new tables and tile sets along the way. Free, no sign-up, no paywall. Built by one Fil-Am developer because the game my pamilya plays deserved a proper app.

QUICK FACTS

STUDIO

Bayanihan Games · Fil-Am solo dev

VERSION

1.5 (2026)

PLATFORMS

Android (live) · iOS (in development) · Info site at [filipinomj.com](#)

PRICE

Free · No paywall · No pay-to-win

OPPONENTS

3 named AI bots: Lola Winnie, Tita Nene, Kuya Edgar (+ rotating cast) · 4 difficulty levels

PROGRESSION

Mahjong Points (MP) drive a 7-tier Filipino ladder (Baguhan → Hari ng Mahjong) · cosmetics unlocked per tier · 56 achievements · daily challenges

RULESET

17-tile Filipino · Joker tiles · Bisaklat, Sagása, Sietepares, Tódas, Escalera

WHAT MAKES IT FILIPINO

JOKER TILES

Wildcards that substitute for any suit — the signature mechanic missing from international mahjong apps.

BISAKLAT

Winning on the very first draw before any discard. The rarest, highest-paid hand in Filipino mahjong.

SAGÁSA

Completing your pung off another player's discard for an instant payout.

SIETEPARES

Seven pairs win — the high-risk, high-reward path for ambitious players.

TÓDAS

The full clean win. Both elegant and lucrative — a signature Filipino mahjong climax.

17-TILE HAND

The authentic Filipino variant — four more tiles than the 13-tile international version, changing the entire game flow.

HOW TO PLAY

GAME CONTROLS

Your Hand
SELECTING A TILE — Tap any tile in your hand to select it (it lifts up). Tap it again to discard, or tap a different tile to move your selection. Once selected, press Discard to throw it.
SORTING YOUR HAND — Press Sort Hand to automatically arrange your tiles by suit and number. You can also drag tiles left and right to reorder them manually.
Calling Tiles
PUNG / CHOW / RONG BUTTONS — When a bot discards a tile you can use, call buttons appear automatically in the action area. You have a few seconds to decide — tap Pass if you don't want the tile.

"I named the bots after the people I learned from — Lola Winnie, Tita Nene, Kuya Edgar. The first time you face Lola Winnie at the table, something clicks. This isn't just a mahjong app. It's the version we play."

— ANDREW ANDRADA, BAYANIHAN GAMES
